

NEERC

Summary of March 19, 2008 Meeting

Thanks to Dr. Michael Manning, Director of Technology Transfer at WPI, for an excellent snapshot into the process of “Technology Transfer” and the bottom line effects – the creation of jobs! According to Dr. Manning, Life Sciences / Healthcare / Biotech / and Pharmaceuticals are huge growth areas for Massachusetts, focusing on the Metro West area where WPI is centrally located.

The NEERC audience was full of questions, especially from those members whose businesses were directly related to the technology industry.

From left to right, Ilene McCune, Michael Manning, Tina Kerkam

We look forward to seeing everyone at our next meeting in May 2008!

Best regards,

Stan Straube
